

Healthcare Process & Technology Optimization

Efficiency Engineers enables safe & effective adoption of healthcare technology by optimizing processes & systems to realize greater returns on investment in technology & people.

Providers will be able to:

- Improve care process, workflow and safety
- Avoid a solution that does not adapt well to the local clinical environment
- Encourage effective vendor participation through objective third party oversight
- Select the products and technology that optimally fit the customer’s needs
- Facilitate adequate and efficient testing and training

Implementing new software often exposes latent problems or flawed processes with existing manual systems. These processes must be optimized before implementation.

Healthcare Solutions

Free Consultations	▪ Discuss issues, needs & situations
Process Assessments	▪ Receive a data-driven report with findings & recommendations
Implementation of Changes	▪ Project Management Professionals execute strategies
Software Selection	▪ Develop your requirements prior to vendor contact
Software Implementation	▪ Ensure data integrity while integrating software & process training
Training Seminars	▪ Educate internal staff on Lean, 6 Sigma, processes/systems & more

Utilize Efficiency Engineers’ Expertise to Boost Productivity

- Run your office more efficiently and reduce costs so you can focus on quality of care
- Prevent medical errors; increase administrative efficiencies; decrease paperwork
- Increase retention and satisfaction of patients and employees
- Reduce risk of healthcare IT investment; ensure interoperability/compatibility

Efficiency Engineers utilizes industrial engineering expertise with the latest technology using proven methodologies and tools to enable businesses.

We produce end-to-end operational excellence.
